Data Security

All communication between your browser and our servers uses the HTTPS protocol that encrypts data before it travels over the network. In addition, passwords are not stored in clear in our database but are encrypted using the latest password security technologies. Finally, the communications between our different servers are done on a private network that is not accessible from outside.

Advertising

Diryanchi does not offer advertising related to the profile but only in the context of the pages consulted: the promotion zones display sponsored works, they appear on the homepage or inside the site and can show for example works of type "sculpture" if you visit the sculpture page, or painting, if you visit the painting page.

When we do not have any advertising to display, we may eventually use outside providers, such as Google Ad Exchange, which advertises generally based on your profile. You can view Google's GDPR compliance details on the following page:
https://privacy.google.com/intl/fr_fr/businesses/compliance/#?modal_active=none

Finally, some advertising customers use external advertising management platforms at Diryanchi. In this case, we do not program a banner, but a "tag", ie an HTML code, which dynamically calls the customer's advertisements. In this case, the client has access to basic connection data (IP address for example), but NEVER to the data of Diryanchi members. The advertiser may also have access to information about you regardless of Diryanchi (for example if you have data related to Google, Facebook, or retargeting sites and there is an agreement between these companies and the advertiser, it may have access to some common data shared by Google, Facebook etc ... To oppose it, you need to manage the access rights with these platforms.

Other third parties

Other third parties may also intervene on the platform as follows:

Share buttons (Facebook, Twitter, Instagram etc ...) on most pages, which, when you are connected to these platforms and surf Diryanchi, will store personal information according to their own rules.

Google Analytics, to better know our audience, the information is however anonymous (IP anonymized).

As with most online communities, our moderators have restricted access to member data, such as the email address of the account, the date and time of the last IP address site connections, the history of moderated content, or deleted and moderation history. Moderators do not have access to private messaging

The member form contains the information that you have filled in at registration / editing including the following information:
